The trapping season is January 15-30, 2022, in Kentucky Hunt Areas 2, 6, 7, and 9, and in Tennessee Hunt Area 13. There will be a beaver trapping season February 1-28 in Kentucky and Tennessee in all Hunt Areas. All dates coincide with the respective state determined dates for this activity and are under state jurisdictions. Areas closed to hunting are also closed to trapping. All trappers must also possess a Land Between the Lakes Hunter Use Permit and a state trapping license. Legal traps, sets, species, and limits must conform to state and federal regulations. All traps must bear the trapper's name and address. All bobcats and river otters must be reported and tagged according to state regulations. River otters may be taken during February beaver trapping days which coincide with state river otter seasons for the respective counties. This permit provides no special authorities or allowances that exceed the licensing authority of the states.

By signing this permit, I hereby acknowledge that I have received a trapping report form that is to be completed and returned to the Land Between the Lakes Administrative Office at 100 Van Morgan Drive, Golden Pond, KY 42211 within one week after the end of the trapping season.

I also understand that failure to return the completed trapping report will prevent me from being able to obtain a permit to trap at Land Between the Lakes during the following season.

I plan to trap the following seasons: _____ January 15– 30, 2022 _____ February 1-28, 2022

Trapper's Signature
